

AR-CHEM AG AGRI-BEST FOAM MARKER

Agricultural Foam Marking Concentrate

Form: Liquid

Color: Dark Blue

Odor: Alcohol

pH: N/D

Solubility (in water): N/D
(in mineral spirits): N/D

VOC Content (% by wt): < 25

Flash Point (ASTM D-7821): 93°F

Specific Gravity: 1.00 g/cm³

Density: 8.35 lbs/gal

Storage Stability (at 70°F): 1 year

Ingredients	C.A.S. #
Water.....	7732-18-5
Sodium Laureth Sulfate	9004-82-4
N-Butyl Alcohol.....	71-36-3
Ethanol	64-17-5
Ammonium Decyl Alkoxy Sulfate	65423-86-1

DIRECTIONS: Depending upon water hardness, AGRI-BEST FOAM MARKER may be used at dilutions ranging from 120:1 to 60:1. Under most water conditions the dilution will be 80:1 (1/2 gallon of AGRI-BEST FOAM MARKER to 40 gallons of water). If foam is "soupy" or runny add more AGRI-BEST FOAM MARKER in small quantities (one pint) until a thick, abundant, "shaving cream" type of foam is generated. If foam is too dry, increase the dilution ratio with water. In soft water conditions, a dilution of up to 120:1 may be achieved. If extremely hard water conditions exist, use 1 quart of ArChem Ag's CHEMICAL WATER SOFTENER per gallon of foam marker in the foam generating tank. If poor foam is still produced, check for a malfunction in the foam generating system.

If possible, fill the foam tank one-half full of water, add AGRI-BEST FOAM MARKER, then finish filling the tank by placing the hose in the bottom of the foam tank to avoid excessive foaming out of the top of the tank.
