Winterinse

Deicing Salt Residue Remover

Winter can be very tough on your carefully maintained floors. Regular use of ice melting chemicals create a dull film at building entranceways that track onto other floors and carpeting. Daily cleaning with detergent-based cleaners produces white hazy material that is extremely difficult to remove. Remove this unattractive material from your floors with **WINTERINSE**. Don't let winter take its toll on your beautiful floors, preserve their attractive appearance with **WINTERINSE**.

DIRECTIONS:

FOR DAILY DAMP MOPPING: Prepare a solution containing one ounce of **WINTERINSE** for each gallon of rinse water. Apply liberally to floor with a mop, allowing the solution to set for several minutes. Rinse with clean, clear water, being certain to wring out mop frequently.

TO REMOVE HEAVY FILM: Dilute two ounces of **WINTERINSE** in one gallon of rinse water.

NFPA® RATINGS:

Health: 1; Flammability: 0; Reactivity: 0

INGREDIENTS/CAS #:

Water (7732-18-5); Sulfamic Acid (5329-14-6); Linear Alcohol Ethoxylate (34398-01-1); Glycerin (56-81-5); Benzaldehyde (100-52-7).
