If eye irritation persists: Get medical advice/attention. Get medical advice/attention if you feel unwell.

STORAGE: Store in a well-ventilated place. Keep container tightly closed. Store locked up.

DISPOSAL:

Dispose of contents/container to comply with local/regional/national/international regulations.

For industrial and commercial use only.

For additional information, see Safety Data Sheet.

SNOW & ICE INHIBITOR quickly penetrates and dissolves frost, snow and ice accumulations and prevents further buildup. It will not cause damage to, or form residue on, asphalt, concrete, terrazzo, aluminum, steel, plastic, rubber or painted surfaces.

Originally formulated to prevent ice formation on aircraft, **SNOW & ICE INHIBITOR** is now available for use on stairs, sidewalks, driveways, bridges, ramps and loading docks where ice and snow pose a safety hazard. It also prevents the freezing of locks, chains, hinges, linkages, control boxes and coal conveyors.

SNOW & ICE INHIBITOR can also be mixed with sand to improve traction on drives, parking lots, sidewalks, docks and entry ways. Treated sand provides triple the traction of untreated sand, will not freeze in trucks or spreaders, and will not blow away.

DIRECTIONS:

SNOW & ICE INHIBITOR is ready-to-use. Coverage is 1 gallon per 500 - 750 square feet. In milder climates where the temperature will not drop below 10°F, **SNOW & ICE INHIBITOR** may be diluted 1:1 with water. Apply by spraying, brushing, or swabbing onto surface. To treat sand, use 1 to 3 gallons of **SNOW & ICE INHIBITOR** per cubic yard of sand. Spread treated sand at the rate of 50,000 to 60,000 square feet per cubic yard.

NOTE: **SNOW & ICE INHIBITOR** will become diluted as it works, and re-application will be necessary during heavy snowfall or sleet.

NFPA® RATINGS:

Health: 1; Flammability: 1; Reactivity: 0

INGREDIENTS/CAS #:

Ethylene Glycol (107-21-1); Water (7732-18-5); Carbonyl Diamine (57-13-6); Diethylene Glycol (111-46-6); Methylenediurea (13547-17-6).
