

BREEZE EASE

Drift Retardant and Deposition Aid

Form: Liquid
Color: Milky White
Odor: Hydrocarbon
pH: 6.00 – 8.00 (when diluted with water)
Solubility (in water): Soluble
 (in mineral spirits): Insoluble
VOC Content (% by weight): N/D
Flash Point (ASTM D-7821): >200°F
Specific Gravity: 1.00 g/cm³
Density: 8.35 lbs/gal
Storage Stability (at 70°F): 1 year

<u>Ingredients</u>	<u>C.A.S. #</u>
Water.....	7732-18-5
Polyacrylamide	No CAS Number
Hydrotreated Petroleum Distillate	64742-47-8

Great for use in...
<ul style="list-style-type: none"> • Dessicants • Cotton Defoliants • Water Soluble Pesticides • Wettable Powder Pesticides
<ul style="list-style-type: none"> • Always refer to the pesticide label for proper use rates or conditions.

Mixing: Prior to pesticide application, clean mixing and application equipment according to pesticide label directions. Fill mix tank with water and pesticide and begin agitation. SHAKE BOTTLE OF BREEZE EASE BEFORE USING. For best results either: (1) inject BREEZE EASE into the suction side of the feeder or recirculating pump to obtain adequate dispersion of the polymer throughout the pesticide solution, or (2) gradually add BREEZE EASE liquid to the rapidly agitating tank mix in the area of highest turbulence by pouring a very thin stream. Continue to agitate mix tank continually for a minimum of 2 minutes before spraying. **Directions For Use:** This product is eminently strong and efficient in mixing as low as 1 oz. per 100 gallons. Begin with lower dosage and increase as needed. A condense or “stringy” solution implies that too much breeze ease has been used.

General Usage Range: 1 – 6 oz. per 100 gallons of spray solution
 Cone or raindrop nozzles 1 – 2 oz.
 Flat fan or flood nozzles..... 1 – 4 oz.
 Off center nozzles 3 – 6 oz.
 Spray gun (30 – 50 psi) 5 – 8 oz.
