DIRECTIONS

Shake well before using. Always test fabric, carpet, or surface to be cleaned in a small inconspicuous area for colorfastness and damage to fiber backing as carpeting/fabrics qualities varies widely. Spray soiled surface until moist. Allow at least 5 minutes chemical action time, then blot up with damp Turkish towel or clean cloth. If spot remains, brush pile in opposite direction and retreat. For pre-spotting before shampooing carpet or laundering textiles, saturate spots and stains and agitate. For extreme conditions, repeat process. For Kool-Aid and other hard to remove stains, wet surface thoroughly with product and allow to remain for at least 30 minutes. Remove using a neutral soap and water solution. Repeat if necessary.
