

Fire Escape

Odor Control

Form: Aerosol

Color: White

Odor: Characteristic

pH: 7

Solubility (in water): Insoluble

Storage Stability (at 70°F): 1 year

This Product Contains:	CAS#
Acetone	67-64-1
Propane	74-98-6
n-Butane	106-97-8
Fragrance	N/A

Effective At

- Eliminating smoke and fire odors
- Freshening cigarette & cigar odors in cars and rooms
- Penetrates cracks, crevices, and porous materials to eliminate odors
- Treats up to 10,000 cubic feet
- Safe on all surfaces

Directions for Use: Use **FIRE ESCAPE** Odor Control to kill cigarette and cigar smoking odors as well as after-fire odors. Use one can for every 10,000 cubic feet of room space. Remove all debris and furnishings that are to be discarded before beginning treatment. Close windows, doors, and vents. In automobiles, turn on heating or air-conditioning fans. Place the can in a central location or pointed directly at the burned area, on top of a protective sheet or tray. Remove the cap and firmly press the button to lock it down. This will start the fogging action. Vacate the area. Be sure to close the exit door or window as you leave. Allow the aerosol to dispense entire contents. At 75°F, the aerosol fogger should discharge for about five minutes. The time will be less in higher temperatures, longer in lower temperatures.
